

If you are struggling to afford to keep your home heated to at least 18°C...

Plan to keep just one or two rooms warm safely

- Check out the best way to use your heating system
- Use your heating controls and thermostatic radiator valves (if you have them)
- Maintain ventilation and air flow to avoid damp and mould

Keep yourself warm

- Wear several light layers of warm clothes
- Keep active indoors
- Have hot drinks and meals
- Use hot water bottles or microwavable wheat bags

We're here to help you keep warm and well this winter

Cold Homes Kill

Beware of heating risks

- Reduce fire risk from open fires and portable heaters
- Un-swept chimneys or damp wood can start chimney fires
- Install a carbon monoxide monitor
- You can ask the fire service for a free home safety visit
- Check your electric blanket is safe to use.

Damp and mould

- Causes breathing problems
- Makes asthma worse
- Can cause damage to possessions and buildings
- You can deal with damp and mould by following the steps provided on our web page. If you rent your home, you can also alert your landlord.

Cold causes blood to thicken and blood pressure to rise, increasing the risk of stroke and heart attack

Heat your home to at least 18°C

Did you know?

- Below 16°C breathing becomes more difficult
- Below 12°C there is strain on the heart and risk of heart attack
- Below 9°C can cause hypothermia and risk of death
